Art Unit: 1714

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by West.

West discloses processes for the decontamination of PET which comprise reacting with ethane diol at or near the boiling point followed by recovering short chain PET and BHT by filtration optionally in the presence of activated carbon or clay.

The instant claims recite “treating a composition comprising unembrittled PET”. The reference is seen as starting with unembrittled PET which PET becomes embrittled only after the process has begun.

Therefore the reference anticipates the rejected claims.
